according to quantity. As a rough guide, however, prices for a volume of 300 pages have been \$700-\$800 for the first hundred copies and \$150 for each additional hundred.	
If the Agency prefers to have print reports, we would propose that a printing allowance be included in each project budget. We would not submit a separate budget for our report section but would apportion charges to specific projects in accordance with the work performed.	50X1
During the coming summer, two projects are scheduled for completion. The report of one of the projects tentatively will consist of about 3000 pages assembled in 69 different volumes with a range of 50-300 copies of each volume required. The report of the second project will be approximately 500 pages.	
We would like to request an immediate decision regarding printing, for is to perform this function we will have to start now to employ our staff and process clearances in order to handle the work scheduled for early summer.	50X1
